"I can say without exception that any and every time we have needed help or support, KineticD™ has been the epitome of professionalism."

Hector M. Guevara, Ph.D.
CEO, NuEnergy Technologies Corp.

Location

Largo, Florida

Industry

Renewable energy systems and services

Challenges

Required a reliable backup solution that would provide remote access to all corporate data while still keeping it secure at an affordable cost

Solution

KineticCloud™ Backup

Benefits

Free KineticCloud™ Remote Desktop allows employees to access their work computers from any location

Overview

NuEnergy Technologies is a developer and manufacturer of sustainable energy sources, founded in 2009 by Dr. Hector M. Guevara. Dr. Guevara installed a solar power system in the White House in 1979, and is renowned for his accomplishments in renewable energy projects and technological innovations over the past three decades. The majority of NuEnergy offices are located in North and South America, with the rest of the offices in various locations around the world. NuEnergy is engaged in the development, marketing, and deployment of renewable energy products and services. Their products include high efficiency thermal panels, wind turbine systems, and flywheel energy storage systems. They also provide a range of “clean energy” consulting services to companies who wish to start renewable energy projects.

The Technology Partner Solution

Dr. Guevara spent a lot of time looking for the right backup solution to meet NuEnergy’s unique needs. With satellite offices in Florida, Mexico, Columbia, and Ecuador, NuEnergy needed a solution that would allow them to access their data from any location, at any time, with an affordable price. The solution: KineticCloud™ Backup.

KineticCloud™ Backup offers leading edge online backup technology to protect the entire SMB environment and is now providing NuEnergy’s North and South American offices with continuous access to their corporate data. KineticCloud™ Backup is quick and easy to install and is specifically designed to ensure the protection of PCs, Macs, servers, and databases. KineticCloud™ Backup is an automated backup system that stores your data offsite and is accessible from any location.

Business Benefits

With KineticCloud™ Backup, NuEnergy can rest assured that their corporate data is being stored securely and offsite. With the free built-in KineticCloud™ Remote desktop feature, Dr. Guevara’s mobile workforce is able to access their work computers while travelling. The automated technology used by KineticCloud™ Backup reduces the laborious administrative task of performing manual backups, giving NuEnergy the peace of mind that they are disaster-ready.

KineticD™’s knowledgeable support staff is always available for assistance. Dr. Guevara reflects on his KineticD™ experience so far: “I can say without exception that any and every time we have needed help or support, KineticD™ has been the epitome of professionalism; top-notch and genuine. It really validated our choice because our data is available when we need it and wherever we need it.”

Looking Forward

Dr. Guevara has been pleased with the ease of access to corporate files from remote locations, and the professionalism of the support staff at KineticD™. KineticD™ CEO Jamie Brenzel says, “We are thrilled to protect NuEnergy’s data and we look forward to providing his team with ongoing support and assistance in the future.”
